

Lab 1.7.1 Printing data

Objectives

Familiarize the student with:

- printing float numbers in specific formats.

Scenario

Define five variables in your code. Assign the values from the input to these variables. Print these variables to get the specified output.

Example input

```
Put these values into your code:  
2.3  
2.3  
2.123456  
2.123456  
2.123456
```

Example output

```
2.3  
2.30  
2.123456  
2.12  
2
```
