

Lab 1.7.3 Getting input from user

Objectives

Familiarize the student with:

- obtaining input from user;
- concatenating given data.

Scenario

Write a simple code to input an IP number. Check the given data with a few simple conditions (i.e. if the number is in the range from 1 to 255) and concatenate it into an IP number. You must get four numbers from the user, connect them with dots and print them.

Example input

```
4
2
255
212
```

Example output

```
4.2.255.212
```

Example input

```
4
1
2
3
```

Example output

```
4.1.2.3
```
